

Whosoever
BELIEVETH IN HIM
should not perish, but have
eternal life.

JOHN 3:15

Easter is the greatest and most important Christian holiday, when we rejoice in the resurrection of Jesus Christ. However, this holiday consists of a whole series of holidays, since we also have to prepare for it. There is a more distant preparation, which is the Lenten season and there is a closer preparation which is the Holy Week, and the Triduum Sanctum: Holy Thursday, Good Friday and Holy Saturday. Each day has its own characteristics, but the most outstanding is the ceremony of Easter night. The liturgy dramatically presents the mysterious resurrection of Christ, as light triumphs over darkness. In the vigil mass, which begins with the celebration of light. The light is Christ, who fills the church. It becomes noticeable that the church building protects the light and separates it from the outside darkness. Those who are inside are showered with the light of Easter, and those who are in the church participate in the encounter with Christ and gain eternal life. Thus, the church has infinite value, since God Himself wished it this way. The Old Testament already had a temple and Christ went up there several times to celebrate the Passover. Since then, the temple has been the physical manifestation of the spiritual church. That is why nations or communities have always built their own church to have a place of their salvation. We also gather in a church, in the Hungarian church, to witness and participate in the divine mysteries. We really are as our church is. Therefore, let us support our church this year as well, so that we can continue believing in our faith in order to survive as the community of deserving heirs of the Kingdom of God!

In Christ,
Fr. Imre Juhász
